

Improving the fundamental movement skills of kids aged 3-8, KIDDO offers physical literacy programs and resources for educators, coaches and parents.

Improve your Move

KIDDO is something different. Something fun. Something that every child, every parent and every educator can enjoy.

Ever heard of 'physical literacy'? Basically, it's helping children develop the skills and confidence to be able to do things like running, jumping, throwing and catching.

Physically literate kids:

- Have a lot more fun being active
- Have better social skills
- Are happier and more confident
- Have improved attention and concentration levels

Working specifically with children aged 3 – 8, the **KIDDO** program has been scientifically designed by the team at UWA to help nurture a love of physical activity that will last a lifetime.

“KIDDO helped me realise the importance of teaching the fundamentals”

Rachel Ortlepp
AFL Coach

Developing Confident and Competent Movers

Get ideas for training sessions to help with the development of fundamental movement skills.

Use our challenges to see which skills you need to focus on and learn how to teach them.

KIDDO runs programs at UWA, schools and Early Childhood Education and Care (ECEC) Centres. See over for more details.
