

KIDDO Sporting Schools + A+ Package

Providing teachers with evidence based physical literacy programs and resources for the early childhood years. KIDDO brings fresh ideas and programs backed by the latest research, adding value to the work you are already doing, supporting you to implement the curriculum.

Cost: \$4500 [Book your KIDDO package now](#)

What will the KIDDO package provide our school?

- Our world-leading Professional Learning - Online Certificate of Physical Literacy
- Online Fundamental Movement Skill Assessment & Reporting tool
- Annual Fundamental Movement Skill results report for your school and recommendations
- Tailored program developed for your school
- Lesson plans, 100s of activity ideas and videos
- Parent engagement tools & resources
- 4 hours of remote support
- Series of 3 webinars, Introduction to KIDDO Program & Resources; Implementing Physical Literacy; Physical Literacy at your school 2020 and beyond
- 4 x Hard copy Physical Literacy In Primary Schools manual
- Multi-year subscription to KIDDO online resources centre

What do we need to do to implement KIDDO?

1. Get all your early childhood staff on board, including support staff, Physical Education teachers and the school leadership team to attend the introductory webinar to hear what it is all about – then make a plan on how it can work best at your school
2. Find two staff who are interested in championing the program
3. Encourage staff to complete the Certificate of Physical Literacy – if possible provide time on staff development days for completion
4. Plan as an early childhood group how you will use the KIDDO program and resources to add value to the programs you are already delivering – this is not a one size fits all program, KIDDO is designed to add value to the work you are already doing

How many staff can participate?

Unlimited. We would encourage as many staff as possible to participate to help aid the successful implementation at your school. However, you may choose just to focus on a particular year group or teachers to participate if you wish. It may be that your foundation year teachers would like the program however other years are not as interested. This is a school decision. With this package, your school will have access to the program and resources until mid-2022, additional teachers will be able to join in or access the resources at any point.

When will the webinars be held?

Webinars will be held on the following dates and times:

*Series 1:	*Series 2:
Thursday 18 th June, 4:00pm (AWST)	Monday 3 rd August, 4:00pm (AEST)
Thursday 23 rd July, 4:00pm (AWST)	Monday 14 th September, 4:00pm (AEST)
Thursday 29 th October (AWST)	Monday 9 th November, 4:00pm (AEST)

*Please note you only need to attend ONE webinar series and **you can choose to view a replay of the webinar at a time and date that suits your school**. We would encourage you to view as a group to aid discussion and planning. If needed a third series will be added, starting in Term 4.

We are already delivering a Fundamental Movement Skills program, is this meant to replace it?

KIDDO aims to add value to the work you are already doing through fresh ideas, the latest research and resources that will make your life easier. Each school will choose different aspects of the KIDDO program to utilise in their setting. You may already have a fantastic Physical Education program but the classroom teachers could use some help building movement into their classroom lessons or you would like to start tracking your student's development of their skills or you may want some assistance to engage parents in their child's physical development.

How does the FMS assessment and reporting tool work?

The KIDDO Challenge is a validated assessment tool that allows you to easily assess and track your students' FMS development as well as report to parents. For each skill you can use both formative and summative assessment.

Instantly calculate percentile ranks and see how your students rank with others of the same year group across Australia and communicate to parents with interactive, visual reports that help engage parents in the development of their child's physical literacy.

How much work will it mean for me?

While in the short term your staff will need to commit some time to attending webinars and completing professional learning, in the long term we hope the KIDDO program will save you time by providing you access to all the tools you need for planning, delivery and assessment.

Do staff have to complete the e-learning or can they just attend the webinars?

We would greatly encourage your staff to complete the e-learning as it goes into Physical Literacy in a lot greater detail than we are able to in the webinars. The e-learning consists of 6 modules and takes approximately 3 hours to complete. Staff will receive a certificate of completion and acknowledge of their professional development time. Only staff who have completed the e-learning will be given access to the KIDDO Challenge, FMS assessment and reporting tool.

I am the school P.E. teacher, why do the classroom teachers need to participate?

With most students in Foundation – Year 2 only receiving a maximum of one 45 minute P.E. lesson a week, it is essential classroom teachers also have the skills, confidence and resources to help encourage the development of Fundamental Movement Skills in their students. Whether this is part of morning fitness, 3 x 10 minute daily brain breaks, transition activities or a 20 minute session three times a week it adds value to the work being done in the P.E. program and helps develop a whole-of-school culture that values education through movement.

Does this count for my Professional Development hours?

After attending the workshops and completing the online training you will receive a ‘Certificate of Physical Literacy’ with a recognition of the number of hours of professional learning you participated in. The Certificate of Physical Literacy is currently undergoing review by NESA for accreditation.

Including practical information, curriculum links, FMS information and teaching tips, programming guides, lesson plans, activity cards, posters, and more!

PLUS 100's more downloadable resources, lesson plans, videos and information are available in our Physical Literacy Resource and Training Centre

What are educators saying about KIDDO?

"Reminded me of what we should be focusing on for the children. I loved the fun and simple ideas."

- Kindergarten teacher, Harrisdale Primary School

"I loved the PD and all the information on the website. I would have loved to have had all this information 5 years ago. Well done!"

- Pre-Primary teacher, Redcliffe Primary School

"It has got my staff talking about how we can do this together instead of just the PE teacher doing it all!"

- Jemima Tomlinson, Deputy Principal, North Balga Primary School

I was very impressed by the high standard of the PD. This is one of the most carefully designed and interesting online PD's I have ever done, it was easy to use and very helpful. We have lots of students who have various physical and psychological disabilities and are in our main stream classes. Now I can at least try a lot more ways to differentiate the lessons and hopefully engage them more fully. Country kids are usually pretty active but the range of ability in even one class can be enormous. Please say a big thank you to the team who put it together.

- Year 1 teacher, Rural Primary School

"The KIDDO program was amazing, we were all extremely lucky to be given such an opportunity to upskill ourselves in this area of education. We now use the KIDDO program throughout the day as brain breaks and opportunity to get enthusiastic about the next learning task"

- Helen McDowell, Year 2 teacher, Southwell Primary School
